

Our highly-skilled, international technical team works in an agile environment using cutting edge technologies. Together, we develop and shape our unique range of products. In this setting, it's crucial that every single team member actively contributes his or her own ideas toward the success of the whole company.

In order to ensure the best performance, our tech team in Munich is looking for a

(Senior) Frontend Engineer (f/m/x)

These tasks are waiting for you:

- Develop and design the intuitive and aesthetically pleasing interface of our Admin Center using our latest tech stack
- Continuous evaluation and improvement of technology decisions and implementation strategies
- Creation of high-quality code as well as the associated tests and code reviews
- Close cooperation with the entire development team and the product department
- Bring in your own ideas :)

This is our frontend tech stack:

- HTML5
- JavaScript / TypeScript
- CSS3 / SCSS
- NodeJS / NPM
- Angular 7
- Webpack

What we offer:

- Working in an international, open-minded team, you'll be consistently inspired by experienced professionals
- We encourage you to constantly contribute your own ideas
- Both professional and personal development
- Flexible working hours on a base of trust
- A modern office located in the heart of Munich at Prinzregentenplatz

Required skills:

- Degree in Computer Science or equivalent practical experience
- Experience in frontend development or fullstack
- Very good programming skills
- You enjoy developing aesthetic solutions to offer an appealing UI & UX to our customers
- Highly interested in learning and experiencing brand new stuff
- Fluent in English (German skills are advantages but not required)
